

CONNECTING YOUR NEW DIGITAL SIGN

About Your Digital Sign

Welcome to the Connected Living family! We are so excited to bring you innovations in technology to support your senior living community.

A digital sign is a TV that is typically mounted on the wall with a media player supporting the content that is displayed on that sign. Your community will now have the luxury of being able to highlight all of the amazing things that are going on!

What do you need?

To install your new digital sign, you'll use the equipment that came from Connected Living. You should have received a digital sign installation kit with the following items per digital sign:

- A media player
- An HDMI cord
- An ethernet cord (internet)
- A piece of velco

Steps for Installation

- Plug the media player into an outlet behind the monitor.
- Plug the ethernet cord into the ethernet jack behind the monitor & into the media player.
- Plug the HDMI cord from the media player into an available HDMI port on the monitor.
- Turn on the media player & monitor.
- Switch the monitor to the appropriate HDMI input on the monitor.
